LEADING A RADICAL CHANGE IN CORPORATE GIFTING SUSTAINABLY

OUR AREAS OF IMPACT

CHENCE ZERO

THE CARBON NEUTRAL COLLECTION

Using recycled materials to reduce carbon footprint (calculated by EcoAct - France).

Funding renewable energy projects to offset balance CO₂ footprint via ClimatePartner.

SERIOUS SUSTAINABILITY

Using certified recycled materials with full supply chain traceability.

Contributing 3% to Water.org to provide 24,000 people with lifetime access to clean water & sanitation.

OUR SUSTAINABILITY IMPACT HIGHLIGHTS

ACCUMULATED IMPACT DATA UNTIL MARCH 31, 2024

1,522,110 PLASTIC BOTTLES REPURPOSED

Instead of disposing plastic bottle waste, we collect and reuse it to create new, stylish, recycled products such as bags and polos which are part of our CHANGE Collection.

Since we launched our CHANGE Collection, we have saved 716 million litres of water from use in irrigation in convention cotton.

ENABLING CHANGE AT LARGE ORGANIZATIONS

Enabling 100s of our clients with sustainability efforts and stakeholder education on genuine supply chain sustainability.

24,000 PEOPLE PROVIDED WITH LIFETIME ACCESS TO SAFE WATER

Through our partnership with Water.org, we donate 3% of each sale from our CHANGE Collection to help water-stressed communities get lifetime access to safe water & sanitation.

TOTAL 236,000 KGS OF CO2 EMISSIONS REDUCED THROUGH SMART CLIMATE FINANCING

We have offset a total of 236,000 kg of CO2 from our CHANGE Zero Collection by supporting renewable energy projects financed by ClimatePartner (purchases from 1/4/24 to 30/9/2024).

38,501,000 PLASTIC BOTTLES COLLECTED

Through a collaborative effort with our stakeholders and partners, we have prevented 38.5 million plastic bottles or roughly around 438,911 kgs of plastic from entering the ocean.

INTRODUCING OUR CARBON FOOTPRINT CALCULATOR

ISO 14067

Environmental action from public and private sectors will gather momentum in 2025 and beyond. Many institutions have set ambitious NET ZERO targets in the near future. The first step to NET ZERO is measuring your carbon footprint, which is difficult in a world of complex supply chains and unreliable data / claims.

In partnership with **ecoact** - a world leading French environmental consultancy, we have developed an industry-first carbon footprint calculator (named On Track) to report the impact of most of our products reliably. By assessing our entire supply chain—from raw materials to end-of-life—we provide reliable carbon footprint data in kgs of CO2 equivalent terms. Our tool is ISO-14067 certified by Bureau Veritas, ensuring accuracy and credibility in our data.

How It Works | ecoact

Using Life Cycle Assessment (LCA) methodology to assess the full environmental impact of a product going from extraction, transformation, production, packing, shipping, and use to end of life.

This award reduced **30%** carbon emission compared to a traditional award.

Circular Design is workable solution at a time when the world desperately needs solutions. We create products made with recycled materials, designed to last and fully recyclable. We work to a simple yet immensely challenging rule of 100-10-100. Any product created can only be justified if it's trying to or helping to achieve 100% recycled content, designed for at least 10 years use and then 100% recyclable at the end of it's useful life.

1. Make from recycled materials.

2. Design to last.

3. Ensure 100% recyclable.

THE END OF GREENWASHING

TRANSPARENCY, TRACEABILITY, AND GENUINE SUSTAINABLE IMPACT

We believe true sustainability can only be achieved when there is transparency and traceability. Without genuine proof of the use of recycled materials in a product, all sustainability claims can be considered greenwashing. Our IMPACT and CHANGE collections aim to end greenwashing and lead our industry in a new direction.

IMPACT THE POWER OF TRACEABILITY

AWARE
All recycled content claims are validated with AWARETM which unites a physical tracer with public blockchain technology for trusted traceability.

BIO BOTTLES MADE IN THE NETHERLANDS

Tack Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tack is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

UV protection fabrics are rated between UPF 25-39. Ultraviolet protection factor(UPF) measures blockage of UV-A and UV-B rays. A UPF rating of 25-39 means that our fabric allows 1/25th to 1/39th (2.56-4%) of UV radiation that falls on the surface of the fabric to pass through it. Thus, 96-97.4% of UV rays are not allowed to reach your skin thereby protecting the skin from sunburn and long term skin damage.

- Bamboo eternity pencil writes upto 20,000 metres
- Replaces 100 traditional wooden pencils
- No sharpening needed

WIEN 877 - ETERNITY

eco-neufral Bamboo eternity pencil replaces your traditional wooden pencil. Traditional wooden pencils write only up to around 200 metres, but this bamboo eternity pencil, has a writing length of up to around 20,000 metres using a graphite tip to produce a graphite line. Not only does it write like a pencil, but the markings can be erased. It works by leaving a graphite line on paper just like a regular traditional wooden pencil but it wears down so slowly, that it should outlast up to 100 traditional wooden pencils!

Small Bottle. BIG IMPACT.

Each Ocean Bottle purchased funds the collection of 1000 plastic bottles entering the ocean. That's 11.368kgs of plastic. You can make an impact on ocean plastic today! The funds from the purchase of an Ocean Bottle go towards local communities living near plastic waste streams, who are paid Fairtrade International wages for the collection of ocean-bound plastic. This is all made possible with the help of Plastic Bank and powered by a traceable IBM blockchain verified plastic collection system. The double wall insulation keeps your cold drinks cold and your hot drinks hot. Designed with a dual opening function the leak proof lid gives you the option to sip from the spout and the base and provides easy access for filling, cleaning and adding ice.

THE END OF GREENWASHING

TRANSPARENCY, TRACEABILITY, AND GENUINE SUSTAINABLE IMPACT

Without genuine proof of the use of recycled materials in a product, all sustainability claims can be considered greenwashing. Our IMPACT and CHANGE collections aim to end greenwashing and lead our industry in a new direction.

BIO BOTTLES MADE IN THE NETHERLANDS

Idea: Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

PERSONAL LEATHER ACCESSORIES

PRESENTING A WALLET
THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

SANTHOME SECURITY FOR YOU

How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

Sustainability and Transparency Organization and Certification

Global Recycle Standard (GRS)

The Global Recycled Standard (GRS) is an international, voluntary, full product standard that tracks and verifies a product's recycled content, chain of custody, social and environmental impact and chemical restrictions.

The objective of the GRS is to define requirements to ensure accurate recycled content claims.

Recycled Claim Standard (RCS)

The Recycled Claim Standard (RCS) is used as a chain of custody standard to track recycled raw materials through the supply chain.

The GRS/RCS logo ensures the materials used in the product are genuinely recycled.

Forest Stewardship Council (FSC)

The Forest Stewardship Council (FSC) label is the world's most trusted mark for sustainable forestry.

FSC's pioneering certification system, which now covers more than 200 million hectares of forest, enables businesses and consumers to choose wood, paper and other forest products made with materials that support responsible forestry.
